APPIA
DIAGNOSTIC SOLUTIONS

CAPABILITIES STATEMENT

Company Overview

APPIA Diagnostic Solutions, LLC — Founded by a former Navy Dental Officer, provides enterprise-wide dental cone beam CT (CBCT) subspecialty teleradiology services optimized for distributed operational environments with variable demand. In coordination with BeamReaders' national network of oral & maxillofacial radiologists and Stratovan's proven prime-contractor performance in secure imaging systems and AI-enabled diagnostics, APPIA provides a unified, cloud-native enterprise radiology platform engineered to meet DHA mission requirements for interoperability, readiness, and zero-trust cybersecurity.

Core Competencies

- Rapidly scalable, end-to-end dental and maxillofacial teleradiology services optimized for geographically dispersed MTFs.
- Secure, HIPAA-compliant, HL7/FHIR-capable platform engineered for seamless MHS GENESIS interoperability.
- AI-assisted workflow optimization for triage, image quantification, and clinical decision support.
- Standardized CBCT acquisition, reporting, and technician training to ensure diagnostic-quality imaging and continuity of care.
- 24/7/365 technical support ensuring high network uptime and uninterrupted clinical operations across all facilities.

Company Information

- **CEO/Founder:** Johannes Seywerd, DMD
- **Type:** Small Business (SDVOSB - *pending*)
- **Services:** CBCT Acquisition, Teleradiology, Radiology Platform Integration, AI-Enabled Diagnostics, Federal Imaging Support
- **UEI:** NMLGUTLHFH64 | **CAGE:** 16UL5
- **NAICS:** 621512, 621111, 541512, 541519

Differentiators

- Founded by a former Active-Duty Navy Dental Officer bringing 11+ years of frontline deckplate expertise and headquarters-level operational leadership.
- Proven technical expertise in large-scale, secure imaging networks and cloud.
- Rapid surge capacity: Able to scale to support tens of thousands of additional scans within 60 days.
- Enterprise-wide standardized CBCT ecosystem, including non-ATO site support and secure DICOM transfer.
- Enterprise-wide CBCT asset recovery & optimization.
- Key personnel holding federal security clearances.

Past Performance

Our Strategic Partnerships:

BeamReaders

BeamReaders- the largest oral & maxillofacial radiologist network in the U.S., with 60+ oral and maxillofacial radiologists supporting **700,000+ patient scans nationwide**—delivering unmatched depth, redundancy, and surge capacity.

- **Proven, highly scalable operational model** validated through long-standing partnerships with **multi-site private groups, DSOs, and academic institutions**, currently supporting **10,000+ doctors** across the U.S.
- **Proprietary VoxDental platform engineered for enterprise imaging**, enabling efficient, standardized CBCT interpretation across geographically distributed practices and high-volume workflows.
- **Industry-leading quality assurance framework**, featuring multi-layer peer review, standardized reporting, and consistent diagnostic rigor across all radiologists.
- **Recognized leader in developing integrated AI workflows** purpose-built for next-generation craniofacial diagnostics.

STRATOVAN

Through our strategic partnership with **Stratovan**, APPIA brings access to proven federal prime performance on large-scale federal (TSA and DHS) imaging and security programs:

Development of a DICOS Toolkit and Conformance Testing Software Suite:
- **Client:** TSA/DHS
- **Contract:** # HSTS04-13-C-CT7002
- **Period:** 09/24/2013 - 03/24/2015

Vendor-Neutral Automated Threat Recognition (ATR) Software:
- **Client:** TSA/DHS
- **Contract:** # 70T04018CNAP1138
- **Period:** 09/26/2018 to 09/25/2023

(352) 219-1209
